

Monthly Billing

Computation of utility charges is based on the rates and tariffs of the local utility companies.

Water, Sewer, and Gas charges are processed similarly to the electric computations in that we obtain local municipal tariffs and apply them to metered and, in some cases, estimated usages.

Oakland Utilities is well versed in the use of utility rates in many states. The application of these rates varies from state to state and can utilize everything from time of day billing, to on and off peak usage billing. From Michigan to Wisconsin or from the Carolinas to Louisiana, Oakland Utilities has the experience necessary to compute charges using a variety of different applicable rates.

When you are not using the service, you can turn off the meter by turning the handle to the "OFF" position. This will stop the meter from counting and you will not be billed for the service. If you are using the service, you should turn the handle to the "ON" position. This will start the meter counting and you will be billed for the service. If you are not sure how to use the meter, please call our customer service line at 1-800-555-1234.
